## TABLE OF CONTENTS

<b>PART ONE SCOPE AND FUNDAMENTAL PRINCIPLES</b> .....	ii
<b>CHAPTER 11 SCOPE</b> .....	1
<b>CHAPTER 12 FUNDAMENTAL PRINCIPLES</b> .....	3
<b>12-1 Protection for safety</b> .....	3
12-1.1 General .....	3
12-1.2 Protection against electric shock .....	3
12-1.3 Protection against thermal effects .....	3
12-1.4 Protection against overcurrent .....	3
12-1.5 Protection against fault currents .....	4
12-1.6 Protection against voltage disturbances and measures against electromagnetic influences .....	4
12-1.7 Protection against power supply interruption .....	4
<b>12-2 Design</b> .....	4
12-2.1 General .....	4
12-2.2 Characteristics of available supply or supplies .....	4
12-2.3 Nature of demand .....	5
12-2.4 Electric supply systems for safety services or standby electric supply systems .....	5
12-2.5 Environmental conditions .....	5
12-2.6 Cross-section of conductors .....	5
12-2.7 Types of wiring and methods of installation .....	5
12-2.8 Protective equipment .....	6
12-2.9 Emergency control .....	6
12-2.10 Disconnecting devices .....	6
12-2.11 Prevention of mutual detrimental influence .....	6
12-2.12 Accessibility of electrical equipment .....	6
12-2.13 Documentation for the electrical installation .....	6
<b>12-3 Selection of electrical equipment</b> .....	6
12-3.1 General .....	6
12-3.2 Electrical equipment characteristics .....	6
12-3.3 Conditions of installation .....	7
12-3.4 Prevention of harmful effects .....	7
<b>12-4 Erection and verification of electrical installations</b> .....	7
12-4.1 Erection .....	7
12-4.2 Initial verification .....	8
12-4.3 Periodic verification .....	8
<b>PART TWO DEFINITIONS AND ABBREVIATIONS</b> .....	9
<b>CHAPTER 21 DEFINITIONS</b> .....	10
<b>CHAPTER 22 ABBREVIATIONS</b> .....	40

<b>PART THREE ASSESSMENT OF GENERAL CHARACTERISTICS .....</b>	<b>43</b>
<b>CHAPTER 31 PURPOSES, SUPPLIES AND STRUCTURE .....</b>	<b>44</b>
<b>31-1 Maximum demand and diversity factor .....</b>	<b>44</b>
<b>31-2 Conductor arrangement and system earthing .....</b>	<b>44</b>
<b>31-2.1 Current-carrying conductors depending on kind of current .....</b>	<b>44</b>
<b>31-2.2 Types of system earthing arrangements .....</b>	<b>44</b>
<b>31-3 Supplies .....</b>	<b>46</b>
<b>31-3.1 General .....</b>	<b>46</b>
<b>31-3.2 Supplies for safety services and standby systems .....</b>	<b>46</b>
<b>31-4 Division of installation .....</b>	<b>47</b>
<b>CHAPTER 32 COMPATIBILITY, MAINTAINABILITY AND SAFETY SERVICES 64</b>	
<b>32-1 Compatibility .....</b>	<b>64</b>
<b>32-1.1 Compatibility of characteristics .....</b>	<b>64</b>
<b>32-1.2 Electromagnetic compatibility .....</b>	<b>64</b>
<b>32-2 Maintainability .....</b>	<b>64</b>
<b>32-3 Safety Services .....</b>	<b>64</b>
<b>32-3.1 General .....</b>	<b>64</b>
<b>32-3.2 Classification of safety services .....</b>	<b>64</b>
<b>32-4 Continuity of service .....</b>	<b>65</b>
<b>CHAPTER 41 PROTECTION AGAINST ELECTRIC SHOCK .....</b>	<b>67</b>
<b>41-0.1 Scope .....</b>	<b>67</b>
<b>41-0.3 General requirements .....</b>	<b>67</b>
<b>41-1 Protective measure: automatic disconnection of supply .....</b>	<b>69</b>
<b>41-1.1 General .....</b>	<b>69</b>
<b>41-1.2 Requirements for basic protection .....</b>	<b>69</b>
<b>41-1.3 Requirements for fault protection .....</b>	<b>69</b>
<b>41-1.4 TN system .....</b>	<b>71</b>
<b>41-1.5 TT system .....</b>	<b>72</b>
<b>41-1.6 IT system .....</b>	<b>73</b>
<b>41-1.7 Functional extra-low voltage (FELV) .....</b>	<b>75</b>
<b>41-2 Protective measure: double or reinforced insulation .....</b>	<b>76</b>
<b>41-2.1 General .....</b>	<b>76</b>
<b>41-2.2 Requirements for basic protection and fault protection .....</b>	<b>76</b>
<b>41-3 Protective measure: electrical separation .....</b>	<b>78</b>
<b>41-3.1 General .....</b>	<b>78</b>
<b>41-3.2 Requirements for basic protection .....</b>	<b>78</b>
<b>41-4 Protective measure: extra-low-voltage provided by SELV and PELV ....</b>	<b>79</b>
<b>41-4.1 General .....</b>	<b>79</b>
<b>41-4.2 Requirements for basic protection and fault protection .....</b>	<b>79</b>
<b>41-4.3 Sources for SELV and PELV .....</b>	<b>80</b>
<b>41-4.4 Requirements for SELV and PELV circuits .....</b>	<b>80</b>

41-5 Additional protection.....	81
41-5.1 Additional protection: residual current protective devices (RCDs)	81
41-5.2 Additional protection: supplementary protective equipotential bonding	82
Annex A.41 (normative) Provisions for basic protection .....	84
A.41-1 Basic insulation of live parts.....	84
A.41-2 Barriers or enclosures.....	84
Annex B.41 (normative) Obstacles and placing out of reach .....	85
B.41-1 Application .....	85
B.41-2 Obstacles.....	85
B.41-3 Placing out of reach.....	85
Annex C.41 Protective measures for application only when the installations are controlled or under the supervision of skilled or (normative) instructed persons	87
C.41-1 Non-conducting location .....	87
C.41-2 Protection by earth-free local equipotential bonding .....	88
C.41-3 Electrical separation for the supply of more than one item of current-using equipment .....	88
Annex D.41 (normative) Provisions where automatic disconnection according to 41-1.3.2 is not feasible .....	89
<b>CHAPTER 42 PROTECTION AGAINST THERMAL EFFECTS .....</b>	<b>90</b>
42-0 Scope .....	90
42-1 Protection against fire caused by electrical equipment .....	90
42-1.1 General requirements .....	90
42-2 Precautions where particular risks of fire exist .....	91
42-2.1 General .....	91
42-2.2 Conditions of evacuation in an emergency .....	92
42-2.3 Locations with risks of fire due to the nature of processed or stored materials .....	92
42-2.4 Locations with combustible constructional materials .....	95
42-2.5 Fire propagating structures .....	95
42-2.6 Selection and erection of installations in locations with endangering of irreplaceable goods.....	96
42-3 Protection against burns.....	96
42-4 Protection against overheating.....	96
42-4.1 Forced air heating systems.....	96
42-4.2 Appliances producing hot water or steam .....	96
42-4.3 Space heating appliances.....	96
Annex A.42 (informative) Arc fault detection devices (AFDD) .....	99
<b>CHAPTER 43 PROTECTION AGAINST OVERCURRENT .....</b>	<b>100</b>
43-0 PROTECTION AGAINST OVERCURRENT .....	100
43-0.1 Scope .....	100
43-0.2 General requirements .....	100

<b>43-1 Protection against overcurrent by automatic disconnection of supply ..</b>	<b>100</b>
<b>43-1.1 Protection of line conductors .....</b>	<b>100</b>
<b>43-1.2 Protection of neutral or mid-point conductor .....</b>	<b>100</b>
<b>43-1.3 Protection against overcurrent .....</b>	<b>102</b>
<b>43-1.4 Protection against overload current .....</b>	<b>102</b>
<b>43-1.5 Protection against short-circuit currents .....</b>	<b>103</b>
<b>43-1.6 Coordination of protection against overload current and protection against .....</b>	<b>105</b>
<b>Annex A.43 (normative) Protection against overcurrent by other means .....</b>	<b>108</b>
<b>A.43-1 General .....</b>	<b>108</b>
<b>A.43-2 Protection against overload .....</b>	<b>108</b>
<b>A.43-3 Protection against short-circuits .....</b>	<b>108</b>
<b>Annex B.43 (normative) Protection against overcurrent by limitation of the characteristics of supply .....</b>	<b>109</b>
<b>Annex C.43 (informative) Protection of conductors in parallel against overcurrent .....</b>	<b>110</b>
<b>C.43-1 General .....</b>	<b>110</b>
<b>C.43-2 Protection against overload current of conductors connected in parallel .....</b>	<b>110</b>
<b>C.43-3 Protection against short-circuit current of conductors connected in parallel .....</b>	<b>111</b>
<b>Annex D.43 (informative) Design current .....</b>	<b>115</b>
<b>Annex E.43 (normative) Cases where automatic disconnection of supply for protection against overcurrent can cause an increased risk .....</b>	<b>116</b>
<b>CHAPTER 44 PROTECTION AGAINST VOLTAGE DISTURBANCES AND ELECTROMAGNETIC DISTURBANCES .....</b>	<b>117</b>
<b>44-0.1 Scope .....</b>	<b>117</b>
<b>44-1 (Vacant) .....</b>	<b>117</b>
<b>44-2 Protection of low-voltage installations against temporary overvoltages due to earth faults in the high-voltage system and due to faults in the low-voltage system .....</b>	<b>117</b>
<b>44-2.1 Field of application .....</b>	<b>117</b>
<b>44-2.2 Overvoltages in LV-systems during a high-voltage earth fault ..</b>	<b>118</b>
<b>44-2.3 Power-frequency stress voltage in case of loss of the neutral conductor in a TN and TT system .....</b>	<b>120</b>
<b>44-2.4 Power-frequency stress voltage in the event of an earth fault in an IT system with distributed neutral .....</b>	<b>120</b>
<b>44-2.5 Power-frequency stress voltage in the event of a short-circuit between a line conductor and the neutral conductor .....</b>	<b>120</b>
<b>44-4 Measures against electromagnetic influences .....</b>	<b>123</b>
<b>44-4.1 General .....</b>	<b>123</b>
<b>44-4.4 Mitigation of electromagnetic interference (EMI) .....</b>	<b>124</b>
<b>44-4.5 Earthing and equipotential bonding .....</b>	<b>127</b>
<b>44-4.7 Cable management systems .....</b>	<b>131</b>

44-5 Protection against undervoltage.....	133
44-5.1 General requirements .....	133
Annex A.44 (informative) Examples of calculated risk level CRL for the use of SPDs	156
Annex B.44 (informative) Guidance for overvoltage control by SPDs applied to overhead lines .....	158
<b>PART FIVE SELECTION AND ERECTION OF ELECTRICAL EQUIPMENT</b>	<b>159</b>
<b>CHAPTER 51 COMMON RULES .....</b>	<b>160</b>
51-0.1 Scope .....	160
51-0.2 General .....	160
51-1 Compliance with standards .....	160
51-2 Operational conditions and external influences .....	160
51-2.1 Operational conditions .....	160
51-2.2 External influences .....	160
51-3 Accessibility .....	161
51-3.1 General .....	161
51-4 Identification.....	161
51-4.1 General .....	161
51-4.2 Wiring systems .....	161
51-4.3 Protective devices .....	162
51-4.4 Diagrams.....	162
51-5 Prevention of mutual detrimental influence .....	162
51-5.3 Electromagnetic compatibility .....	162
51-6 Measures related to protective conductor currents.....	163
51-6.1 Transformer .....	163
51-6.2 Signalling systems .....	163
Annex A.51 (informative) Concise List of External Influences .....	177
Annex B.51 (informative) Interdependence of Air Temperature, Relative to Air Humidity and Absolute Air Humidity .....	178
Annex C.51 (normative) Classification of Mechanical Conditions .....	188
Annex D.51 (normative) Classification of Macro-Environments .....	190
Annex E.51 (normative) Permissible Protective Conductor Currents for Equipment	191
Annex F.51 (normative) Working Space.....	193
Reproduction of Annex B from IEC 61140 (informative) Values of maximum ac limits of protective conductors current for cases E.51-7.5.2.2 a) and E.51-7.5.2.2 b)	195
<b>CHAPTER 52 WIRING SYSTEMS .....</b>	<b>196</b>
52-0.1 Scope .....	196
52-0.2 General .....	196
52-1 Types of wiring systems.....	196
52-1.4 Busbar trucking systems and powertrack systems.....	196
52-1.5 AC circuits electromagnetic effects (prevention of eddy current)	196

52-1.6	Conduits systems, cable ducting systems, cable trunking systems, cable tray systems and cable ladder systems .....	196
52-1.7	Several circuits in one cable.....	197
52-1.8	Circuit arrangements .....	197
52-1.9	Use of flexible cables or cords.....	197
52-1.10	Installation of cables .....	197
52-2	Selection and erection of wiring systems in relation to external influences	197
52-2.1	Ambient temperature (AA) .....	197
52-2.2	External heat sources .....	198
52-2.3	Presence of water (AD) or high humidity (AB) .....	198
52-2.4	Presence of solid foreign bodies (AE) .....	198
52-2.5	Presence of corrosive or polluting substances (AF) .....	198
52-2.6	Impact (AG).....	198
52-2.7	Vibration (AH) .....	199
52-2.8	Other mechanical stresses (AJ).....	199
52-2.9	Presence of flora and/or mould growth (AK) .....	200
52-2.10	Presence of fauna (AL) .....	200
52-2.11	Solar radiation (AN) and ultraviolet radiation .....	200
52-2.12	Seismic effects (AP) .....	200
52-2.13	Wind (AR).....	201
52-2.14	Nature of processed or stored materials (BE) .....	201
52-2.15	Building design (CB) .....	201
52-3	Current-carrying capacities .....	201
52-3.5	Groups containing more than one circuit.....	201
52-3.6	Number of loaded conductors .....	202
52-3.7	Conductors in parallel.....	202
52-3.8	Variation of installation conditions along a route.....	203
52-3.9	Single-core cables with a metallic covering .....	203
52-4	Cross-sectional areas of conductors .....	203
52-4.2	Cross-sectional area of the neutral conductor .....	203
52-5	Voltage drop in consumers' installations .....	204
52-6	Electrical connections .....	204
52-6.8	Connection of multi-wire, fine wire and very fine wire conductors	205
52-7	Selection and erection of wiring systems to minimize the spread of fire	205
52-7.1	Precautions within a fire-segregated compartment .....	205
52-7.2	Sealing of wiring system penetrations .....	206
52-8	Proximity of wiring systems to other services .....	207
52-8.1	Proximity to electrical services .....	207
52-8.2	Proximity of communications cables .....	207
52-8.3	Proximity to non-electrical services.....	207
52-9	Selection and erection of wiring systems in relation to maintainability including cleaning.....	208

<b>Annex A.52 (normative) Methods of installations .....</b>	<b>211</b>
<b>Annex B.52 (normative) Current-Carrying Capacities .....</b>	<b>220</b>
<b>B.52-1 Introduction .....</b>	<b>220</b>
<b>B.52-2 Ambient temperature .....</b>	<b>220</b>
<b>B.52-3 Soil thermal resistivity .....</b>	<b>221</b>
<b>B.52-4 Groups containing more than one circuit.....</b>	<b>221</b>
<b>B.52-5 Groups containing different sizes .....</b>	<b>221</b>
<b>B.52-6 Methods of installation .....</b>	<b>222</b>
<b>Annex C.52 (informative) Example of a Method of Simplification of the Tables of Section 52-3 .....</b>	<b>249</b>
<b>C.52.1 Equivalent wires types current carrying capacities .....</b>	<b>249</b>
<b>Annex D.52 (informative) Formulate to Express Current-Carrying Capacities</b>	<b>253</b>
<b>Annex E.52 (informative) Effects of Harmonic Currents on Balanced Three-Phase Systems.....</b>	<b>257</b>
<b>E.52-1 Reduction factors for harmonic currents in four-core and five-core cables with four cores carrying current .....</b>	<b>257</b>
<b>E.52-2 Examples of the application of reduction factors for harmonic currents</b>	<b>258</b>
<b>Annex F.52 (informative) Selection of Conduit Systems .....</b>	<b>260</b>
<b>Annex G.52 (informative) Voltage Drop in Consumers' Installations .....</b>	<b>261</b>
<b>Annex H.52 (informative) Examples of Configurations of Parallel Cables .....</b>	<b>263</b>
<b>CHAPTER 53 ISOLATION, SWITCHING AND CONTROL .....</b>	<b>267</b>
<b>53-0.1 Scope .....</b>	<b>267</b>
<b>53-0.2 General and common requirements.....</b>	<b>267</b>
<b>53-0.5 Erection of equipment .....</b>	<b>267</b>
<b>53-1 Equipment for protection against electric shock .....</b>	<b>267</b>
<b>53-1.1 General.....</b>	<b>267</b>
<b>53-1.2 Devices for automatic disconnection of supply .....</b>	<b>267</b>
<b>53-1.3 Equipment for protection by double or reinforced insulation.....</b>	<b>272</b>
<b>53-1.4 Equipment for protection by electrical separation .....</b>	<b>272</b>
<b>53-1.5 Equipment for protection by extra-low-voltage provided by SELV and PELV systems .....</b>	<b>273</b>
<b>53-1.6 Devices for additional protection .....</b>	<b>273</b>
<b>53-1.7 Monitoring devices .....</b>	<b>274</b>
<b>53-2 Devices and precautions for protection against thermal effects .....</b>	<b>274</b>
<b>53-2.1 General.....</b>	<b>274</b>
<b>53-2.2 Locations with a particular risk of fire.....</b>	<b>274</b>
<b>53-2.3 Selection of arc fault detection devices (AFDD) .....</b>	<b>275</b>
<b>53-3 Devices for protection against overcurrent .....</b>	<b>275</b>
<b>53-3.1 General requirements .....</b>	<b>275</b>
<b>53-3.2 Selection of devices for protection against overload current.....</b>	<b>276</b>
<b>53-3.3 Selection of devices for protection against short-circuit current</b>	<b>277</b>

53-3.4	Positioning of overcurrent protection devices .....	278
53-3.5	Co-ordination of overload and short-circuit protective functions	279
53-4	Devices for protection against overvoltages .....	279
53-4.1	General .....	279
53-4.2	Void .....	280
53-4.3	Void .....	280
53-4.4	Selection and erection of SPDs .....	280
53-5	Co-ordination of protective devices .....	286
53-5.1	Selectivity between overcurrent protective devices .....	286
53-5.2	Co-ordination between residual current protective devices and OCPDs	287
53-5.3	Selectivity between residual current protective devices .....	287
53-5.4	Selectivity of RCD and OCPD .....	287
53-6	Isolation and switching .....	288
53-6.2	Isolation .....	288
53-6.3	Switching-off for mechanical maintenance .....	289
53-6.4	Emergency switching .....	290
53-6.5	Functional switching (control) .....	291
53-7	Monitoring .....	291
53-7.1	General .....	291
53-7.2	IT systems for continuity of supply .....	292
53-7.3	IT public distribution system .....	292
53-7.4	Off-line systems in TN, TT and IT systems .....	293
Annex A.53	(informative) Position of devices for overload protection.....	302
A.53-1	General .....	302
A.53-2	Cases where overload protection need not be placed at the origin of the branch circuit .....	302
Annex B.53	(informative) Position of devices for short-circuit protection.....	304
B.53-1	General .....	304
B.53-2	Cases where short-circuit protection need not be placed at the origin of branch circuit .....	304
Annex C.53	SPD installation – Examples of installation diagrams according to system configurations .....	306
C.53-1	TT system – 3 phase supply plus neutral .....	306
C.53-2	TN-C and TN-C-S systems – 3 phase supply .....	310
C.53-3	TN-S system – 3 phase supply plus neutral .....	314
C.53-4	IT system – 3 phase supply with or without neutral .....	316
Annex D.53	(informative) Installation supplied by overhead lines.....	319
Annex G.53	(informative) Description of the different types of residual current devices (RCDs).....	320
G.53-1	Description of RCD types .....	320
G.53-2	Examples of use of RCD types .....	320

**CHAPTER 54 EARTHING ARRANGEMENTS AND PROTECTIVE CONDUCTORS**

324

<b>54-0.1 Scope</b> .....	324
<b>54-1 (Vacant)</b> .....	324
<b>54-2 Earthing arrangements</b> .....	324
<b>54-2.1 General requirements</b> .....	324
<b>54-2.2 Earth electrodes</b> .....	324
<b>54-2.3 Earthing conductors</b> .....	325
<b>54-2.4 Main earthing terminal</b> .....	326
<b>54-3 Protective conductors</b> .....	326
<b>54-3.1 Minimum cross-sectional areas</b> .....	326
<b>54-3.2 Types of protective conductors</b> .....	327
<b>54-3.3 Electrical continuity of protective conductors</b> .....	328
<b>54-3.4 PEN, PEL or PEM conductors</b> .....	328
<b>54-3.5 Combined protective and functional earthing conductors</b> .....	329
<b>54-3.6 Currents in protective earthing conductors</b> .....	329
<b>54-3.7 Reinforced protective earthing conductors for protective earthing conductor currents exceeding 10 mA</b> .....	329
<b>54-3.8 Arrangement of protective conductors</b> .....	330
<b>54-4 Protective bonding conductors</b> .....	330
<b>54-4.1 Protective bonding conductors for connection to the main earthing terminal</b> .....	330
<b>54-4.2 Protective bonding conductors for supplementary bonding</b> .....	330
<b>54-5 Functional earthing and functional-equipotential-bonding for Information and communication technology equipment and systems (ICT)</b> .....	330
<b>54-5.1 Functional-equipotential-bonding for ICT</b> .....	330
<b>54-6 Main functional earthing terminal (MFET)</b> .....	331
<b>54-7 Equipotential bonding ring conductors</b> .....	331
<b>Annex A.54 (normative) Method for deriving the factor <math>k</math> in 54-3.1.2</b> .....	335
<b>Annex B.54 (informative) Example of Earthing Arrangements and Protective Conductors</b> .....	339
<b>Annex C.54 (informative) Erection of Concrete-Embedded Foundation for Earth Electrodes</b> .....	341
<b>C.54-1 General</b> .....	341
<b>C.54-2 Other considerations regarding the use of concrete-embedded foundation earth electrodes</b> .....	341
<b>C.54-3 Construction of concrete-embedded foundation earth electrodes</b> .....	341
<b>C.54-4 Possible corrosion problems for other earthed installations outside concrete-embedded foundation earth electrodes</b> .....	342
<b>C.54-5 Completion of concrete-embedded foundation earth electrodes</b> .....	343
<b>Annex D.54 (informative) Erection of Soil-Embedded Earth Electrodes</b> .....	344
<b>D.54-1 General</b> .....	344

D.54-2 Soil resistivity .....	344
D.54-3 Earth electrodes buried in the soil .....	344
D.54-3.1 Constituent parts .....	344
D.54-3.2 Assessment of earth electrode resistance .....	345
D.54-4 Metallic pillar as earth electrodes .....	345
<b>CHAPTER 55 OTHER EQUIPMENT .....</b>	<b>348</b>
55-0.1 Scope .....	348
<b>55-1 Low-voltage generating sets .....</b>	<b>348</b>
55-1.1 Scope .....	348
55-1.2 General requirements .....	348
55-1.3 Protective measure: extra-low-voltage provided by SELV and PELV .....	349
55-1.4 Fault protection (Protection against indirect contact) .....	349
55-1.5 Protection against overcurrent .....	350
55-1.6 Additional requirements for installations where the generating set provides a supply as a switched alternative to the normal supply to the installation .....	351
55-1.7 Additional requirements for installations where the generating set may operate in parallel with other sources including systems for distribution of electricity to the public .....	351
55-1.8 Requirements for installations incorporating stationary batteries .....	353
<b>55-6 Socket-Outlets .....</b>	<b>353</b>
55-6.1 Scope .....	353
55-6.2 Assessment of general characteristics .....	353
55-6.3 Power supply .....	353
55-6.4 Protection for safety .....	353
55-6.5 Selection and erection .....	354
<b>55-7 Auxiliary circuits .....</b>	<b>356</b>
55-7.1 Scope .....	356
55-7.2 Vacant .....	356
55-7.3 Requirements for auxiliary circuits .....	356
55-7.4 Characteristics of cables and conductors – Minimum cross-sectional areas .....	358
55-7.5 Requirements for auxiliary circuits used for measurement .....	358
55-7.6 Functional consideration .....	359
55-7.7 Functional safety .....	361
55-7.8 EMC .....	361
<b>55-8 Electric Appliances .....</b>	<b>361</b>
55-8.1 Scope .....	361
55-8.2 Compliance with standards .....	361
55-8.3 Protection against electric shock .....	361
55-8.4 Circuit overcurrent protection .....	361
55-8.5 Wiring system .....	361

55-8.6 Flexible cords and supply connection .....	362
55-8.7 Earthing .....	362
55-8.8 Installation requirements for some of the electrical appliances in common use .....	362
55-8.9 Marking .....	363
55-9 Luminaires and lighting installations .....	363
55-9.1 Scope .....	363
55-9.3 General requirements for installations .....	363
55-9.4 Protection of the surroundings against thermal effects .....	364
55-9.5 Wiring systems for lighting installations .....	364
55-9.6 Independent lamp controlgear, e.g. ballasts .....	365
55-9.7 Compensation capacitors .....	366
55-9.8 Protection against electric shock for display stands for luminaires	366
55-9.9 Stroboscopic effect .....	366
55-9.10 Luminaires in specific locations .....	366
55-9.11 Luminaires for hazardous locations .....	366
Annex A.55 (informative) Explanation of symbols used in luminaires, in control gear for luminaires and in the installation of the luminaires .....	372
CHAPTER 56 SAFETY SERVICES .....	374
56-0.1 Scope .....	374
56-0.2 Vacant .....	374
56-0.3 Vacant .....	374
56-0.4 Classification .....	374
56-0.5 General .....	374
56-0.6 Electrical sources for safety services .....	375
56-0.7 Electrical Circuits of safety services .....	376
56-0.8 Wiring systems .....	377
56-0.9 Emergency lighting applications .....	378
56-0.10 Fire protection applications or equipment .....	379
Annex A.56 (informative) Guidance for emergency lighting .....	380
Annex B.56 (informative) Guidance for fire protection equipment .....	382
Annex C.56 (informative) Fire switch .....	383
Annex D.56 (informative) Example of installation methods of safety services with cable management system .....	384
Annex E.56 (informative) Wiring systems .....	385
E.56-1 Ambient test temperature rise .....	385
E.56-2 Duration of the safety service .....	385
E.56-3 Expected resistance of feeder conductors .....	385
E.56-4 Protection against electric shock in the event of a failure by means of the touch voltage reduction .....	386
E.56-5 Conductor resistance in case of fire .....	386

E.56-6 High temperature effects .....	386
E.56-7 Feeder circuits .....	386
<b>Annex F.56 (informative) Guidance on suitable locations for electrical sources for safety services .....</b>	<b>387</b>
<b>F.56-1 Recommendation of a suitable location for an electrical source for safety services.....</b>	<b>387</b>
<b>F.56-2 Conditions of fire protection.....</b>	<b>387</b>
<b>CHAPTER 57 Erection of stationary secondary batteries .....</b>	<b>388</b>
57-0.1 Scope .....	388
57-0.4 Operation modes .....	388
57-0.5 Main characteristics of stationary secondary batteries .....	388
57-0.5.1 Types of equipment.....	388
57-0.5.2 Selection of battery .....	388
57-0.5.3 Converter .....	388
57-0.6 Selection and erection of electrical equipment.....	389
57-0.6.1 General.....	389
57-0.6.2 Measures for protection against electric shock .....	390
57-0.6.3 Protection against thermal effects.....	390
57-0.6.4 Protection against short-circuit.....	390
57-0.6.5 Isolation.....	390
57-0.6.6 Unexpected islanding.....	391
57-0.6.7 Protection against other hazards .....	391
<b>Annex A. 57 (informative) Technical characteristics .....</b>	<b>394</b>
A.57-1 Nominal voltage .....	394
A.57-2 Discharge.....	394
A.57-2.1 Discharge voltage curve.....	394
A.57-2.2 Temperature dependence .....	394
A.57-3 Internal Impedance.....	394
A.57-3.1 General.....	394
A.57-3.2 Battery equivalent circuit.....	394
A.57-3.3 Voltage drop .....	394
A.57-3.4 Thermal effects .....	395
A.57-3.5 Time dependence .....	395
A.57-3.6 Gas evolution of lead acid, nickel-cadmium batteries and zinc dibromide aqueous electrolyte .....	395
<b>Annex B.57 (informative) Technical characteristics for battery load .....</b>	<b>397</b>
B.57-1 C-rate.....	397
B.57-2 Battery discharge performance .....	397
B.57-3 Ripple effects .....	397
<b>Annex C.57 (normative) Battery accommodation .....</b>	<b>399</b>
C.57-1 General .....	399

<b>C.57-2 Specific requirements for separate battery rooms</b> .....	399
<b>C.57-3 Specific requirements for the specially separated areas in rooms accommodating electrical equipment</b> .....	400
<b>C.57-4 Accommodation for lead acid and NiCd batteries in the same room</b> .	400
<b>C.57-5 Detection means</b> .....	400
<b>Annex D.57 (informative) Identification labels and warning notices</b> .....	401
<b>PART SIX VERIFICATION</b> .....	402
<b>CHAPTER 61 VERIFICATION</b> .....	403
<b>61-0.1 Scope</b> .....	403
<b>61-4. Initial verification</b> .....	403
<b>61-4.1 General</b> .....	403
<b>61-4.2 Inspection</b> .....	403
<b>61-4.3 Testing</b> .....	404
<b>61-4.4 Reporting for initial verification</b> .....	409
<b>61-5 Periodic verification</b> .....	409
<b>61-5.1 General</b> .....	409
<b>61-5.2 Frequency of periodic verification</b> .....	410
<b>61-5.3 Reporting for periodic verification</b> .....	410
<b>Annex A. 61 (informative) Estimation of the resistance value likely to be obtained during continuity testing</b> .....	413
<b>Annex B. 61 (informative) Methods for measuring the insulation resistance/impedance of floors</b> .....	414
<b>B.61-1 General</b> .....	414
<b>B.61-2 Test method for measuring the impedance of floors and walls with a.c. voltage</b> .....	414
<b>B.61-3 Test electrode 1</b> .....	414
<b>B.61-4 Test electrode 2</b> .....	415
<b>Annex C.61 (informative) Measurement of earth electrode resistance – Methods C1, C2 and C3</b> .....	417
<b>C.61-1 Method C1 – Measurement of earth electrode resistance using an earth</b> 417	
<b>C.61-2 Method C2 – Measurement of earth electrode resistance using a fault loop</b> 417	
<b>C.61-3 Method C3 – Measurement of earth electrode resistance using current clamps</b> .....	417
<b>Annex D.61 (informative) Guidance on the application of the rules of Section 61 Initial verification</b> .....	422
<b>Annex F.61 (informative) Model forms for inspection of electrical installations</b> 425	
<b>Annex G.61 (informative) Model schedule of circuit details and test results</b> .....	435
<b>PART SEVEN SPECIAL LOCATIONS AND INSTALLATIONS</b> .....	436
<b>CHAPTER 701 LOCATIONS CONTAINING A BATH OR SHOWER</b> .....	437
<b>701:11 Scope</b> .....	437
<b>701:3 Assessment of general characteristics</b> .....	437

701:3-01 General .....	437
701:3-02 Description of zone 0 .....	437
701:3-03 Description of zone 1 .....	438
701:3-04 Description of zone 2 .....	438
701:4 Protection for safety .....	438
701:41 Protection against electric shock .....	438
701:41-0.3 General requirements .....	438
701:41-1 Protective measure: automatic disconnection of supply .....	438
<b>CHAPTER 702 SWIMMING POOLS AND FOUNTAINS .....</b>	<b>451</b>
702:11 Scope.....	451
702:3 Assessment of general characteristics .....	451
702:3-01 General .....	451
702:3-02 Description of zone 0 .....	451
702:3-03 Description of zone 1 .....	451
702:3-04 Description of zone 2 .....	452
702:4 Protection for safety.....	452
702:41 Protection against electric shock .....	452
702:41-4 Protective measure: extra-low-voltage (SELV and PELV) ....	453
702:41-5 .....	453
702:5 Selection and erection of electrical equipment .....	454
702:51 Common rules .....	454
702:51-2 Operational conditions and external Influences .....	454
702:52 Wiring systems .....	454
702:52-2 Selection and erection of wiring system in relation to external influences .....	454
702:53 Isolation, switching and control .....	454
702:55 Other equipment.....	455
702:55-101 Current-using equipment of swimming pools .....	455
702:55-102 Underwater lighting of swimming pools .....	456
702:55-103 Electrical equipment of fountains .....	456
702:55-104 Special requirements for the installation of low voltage electrical equipment in zone 1 of swimming pools .....	456
702:753-105 Heating cables and embedded heating systems .....	456
<b>Annex A.702 (informative) Examples of zones .....</b>	<b>459</b>
<b>CHAPTER 703 ROOMS AND CABINS CONTAINING SAUNA HEATERS .....</b>	<b>463</b>
703:11 Scope.....	463
703:3 Assessments of general characteristics .....	463
703:3-0 General .....	463
703:3-01 Description of zone 1 .....	463
703:3-02 Description of zone 2 .....	463
703:3-03 Description of zone 3 .....	463

703:41 Protection for safety – Protection against electric shock .....	463
703:41-1 Protection against both direct and indirect contact.....	463
703:B.41 Obstacles and placing out of reach .....	463
703:B.41-2 Obstacles .....	463
703:B.41-3 Placing out of reach .....	463
703:41-3 Protection against indirect contact.....	463
703:5 Selection and erection of electrical equipment .....	464
703:51 Common rules .....	464
703:51-2 Operational conditions and external influences.....	464
703:52 Wiring Systems .....	464
703:52-2 Selection and erection of wiring systems in relation to external influences .....	464
703:53 Isolation, switching and control .....	464
703:55 Other equipment.....	464
<b>CHAPTER 704 CONSTRUCTION AND DEMOLITION SITE INSTALLATIONS</b>	<b>466</b>
704:11 Scope.....	466
704:3 Assessment of general characteristics .....	466
704:31 Purposes, supplies and structure .....	466
704:4 Protection for safety .....	466
704:41 Protection against electric shock .....	466
704:41-0 Introduction.....	466
704:41-1 Protective measure: automatic disconnection of supply .....	466
704:41-4 Protective measure: Extra-low voltage provided by SELV and PELV .....	467
704:44 Protection against voltage disturbances and electromagnetic disturbances	467
704:44-3 Protection against transient overvoltages of atmospheric origin or due to switching.....	467
704.5 Selection and erection of equipment.....	467
704.51 Common rules .....	467
704:51-2 Operational conditions and external influences.....	467
704:52 Wiring systems .....	467
704:53 Isolation, switching and control .....	467
704:53-6 Isolation and switching .....	467
704.56 Safety services .....	468
<b>CHAPTER 705 AGRICULTURAL AND HORTICULTURAL PREMISES</b> .....	<b>469</b>
705:11 Scope.....	469
705:31-2 Types of distribution system .....	469
705:41 Protection against electric shock.....	469
705:41-1 Protective measure: automatic disconnection of supply .....	469
705:41-4 Protective measure: extra-low-voltage provided by SELV and PELV .....	469
705:42 Protection against thermal effects .....	470

705:42-2 Precaution where particular risks of fire .....	470
705:43 Protection against overcurrent.....	470
705:43-3 Protection against overload current .....	470
705:44-3 Protection against overvoltage of atmospheric origin or due to switching .....	470
705:5 Selection and erection of electrical equipment .....	470
705:51 Common rules .....	470
705:51-2 Operational conditions and external influences.....	470
705:51-3 Accessibility .....	470
705:51-4 Identification .....	471
705:52 Wiring systems .....	471
705:52-2 Selection and erection of wiring systems in relation to external influences .....	471
705:53 Isolation switching and control .....	471
705:53-6 Isolation and switching .....	471
705:54 Earthing arrangements, protective conductors and protective bonding conductors .....	472
705:54-4 Equipotential bonding conductors.....	472
705:55 Other equipment.....	472
705:55-1 Socket-outlets .....	472
705:55-9 Luminaires and lighting installations.....	472
705:56 Safety devices .....	472
Annex A.705 (informative) Examples of equipotential bonding in agricultural premises 474	
Annex B.705 (normative) Obstacles and placing out of reach .....	478
Annex C.705 (normative) Protective measures for application only when the installation is controlled or under the supervision of skilled or instructed persons	479
<b>CHAPTER 706 CONDUCTING LOCATIONS WITH RESTRICTED MOVEMENT</b>	<b>480</b>
706:11 Scope.....	480
706:4 Protection for safety .....	480
706:41 Protection against electric shock .....	480
706:41-1 Protective measure: automatic disconnection of supply .....	480
706:41-1.3 Requirements for fault protection .....	480
706:41-2 Protective measure: double or reinforced insulation .....	480
706:41-3 Protective measure: electrical separation .....	480
706:41-4 Protective measure: extra-low-voltage provided by SELV and PELV .....	480
<b>CHAPTER 708 CARAVAN PARKS, CAMPING PARKS AND SIMILAR LOCATIONS</b>	<b>481</b>
708:11 Scope.....	481
708:31 Purposes, supplies and structure.....	481
708:31-2 Conductor arrangement and system earthing.....	481

708:31-3 Supplies.....	481
708:4 Protection for safety .....	481
708:41 Protection against electric shock .....	481
708:41-5 Additional protection .....	481
708:5 Selection and erection of electrical equipment .....	481
708:51 Selection and erection of electrical equipment – Common rules .....	481
708:51-2 Operational conditions and external influences .....	481
708:52 Wiring systems .....	482
708:52-1 Types of wiring systems .....	482
708:53 Isolation, switching and control .....	482
708:53-3 Devices for protection against overcurrent .....	482
708:53-6 Isolation and switching .....	482
708:53-6.2 Isolation .....	482
708:55 Other equipment .....	482
<b>CHAPTER 709 MARINAS AND SIMILAR LOCATIONS .....</b>	<b>484</b>
709:11 Scope.....	484
709:31 Purposes, supplies and structure .....	484
709:31-2 Conductor arrangement and system earthing.....	484
709:31-3 Supplies.....	484
709:4 Protection for safety .....	484
709:41 Protection against electric shock .....	484
709:B.41-2 Obstacles .....	484
709:B.41-3 Placing out of reach .....	484
709:C.41-1 Non-conducting location.....	484
709:C.41.2 Protection by earth-free local equipotential bonding .....	484
709:41-3 Protective measure: electrical separation .....	484
709:5 Selection and erection of electrical equipment .....	485
709:51 Common rules .....	485
709:51-2 Operational conditions and external influences.....	485
709:52 Wiring systems .....	485
709:52-1 Types of wiring systems .....	485
709:53 Isolation, switching and control .....	486
709:53-1 Devices for protection against indirect contact by automatic disconnection of supply .....	486
709:53-3 Devices for protection against overcurrent .....	486
709:53-6 Isolation and switching .....	486
709:55 Other equipment .....	486
709:55-6 Socket-outlets .....	486
<b>Annex A.709 (informative) Examples of methods of obtaining supply in marinas</b>	<b>488</b>
<b>Annex B.709 (informative) Example of an instruction notice to be placed in marinas</b>	<b>491</b>
<b>B.709-1 .....</b>	<b>491</b>

<b>CHAPTER 710 MEDICAL LOCATIONS .....</b>	<b>492</b>
<b>710:11 Scope.....</b>	<b>492</b>
<b>710:3 Assessment of general characteristics .....</b>	<b>492</b>
<b>710:31 Purposes, supplies and structure .....</b>	<b>492</b>
<b>710:31-3 Supplies.....</b>	<b>492</b>
<b>710:31-4 Division of installation .....</b>	<b>493</b>
<b>710:41 Protection for safety – Protection against electric shock .....</b>	<b>493</b>
<b>710:41-1 Protective measure: automatic disconnection of supply .....</b>	<b>493</b>
<b>710:41-4 Protective measure: extra-low-voltage provided by SELV and PELV .....</b>	<b>494</b>
<b>710:41-5 Additional protection .....</b>	<b>494</b>
<b>710:42 Protection for safety – Protection against thermal effects .....</b>	<b>495</b>
<b>710:42-1 Protection against fire caused by electrical equipment .....</b>	<b>495</b>
<b>710:44 Protection for safety – Protection against voltage disturbances and ..</b>	<b>495</b>
<b>710:44-4 Measures against electromagnetic influences.....</b>	<b>495</b>
<b>710:51 Selection and erection of electrical equipment – Common rules .....</b>	<b>495</b>
<b>710:51-2 Operational conditions and external influences.....</b>	<b>496</b>
<b>710:51-4 Identification .....</b>	<b>497</b>
<b>710:52 Selection and erection of electrical equipment – Wiring systems .....</b>	<b>497</b>
<b>710:53-1 Equipment for protection against electric shock .....</b>	<b>498</b>
<b>710:53-5 Co-ordination of protective devices.....</b>	<b>498</b>
<b>710:53-6 Isolation and switching .....</b>	<b>498</b>
<b>710:53-7 Monitoring.....</b>	<b>499</b>
<b>710:55 Selection and erection of electrical equipment – Other equipment ...</b>	<b>499</b>
<b>710:55-9 Luminaires and lighting installations.....</b>	<b>499</b>
<b>710:56 Selection and erection of electrical equipment – Safety services .....</b>	<b>499</b>
<b>710:6 Verification .....</b>	<b>502</b>
<b>710:6-4 Initial verification .....</b>	<b>502</b>
<b>710:6-5 Periodic verification .....</b>	<b>502</b>
<b>Annex A.710 (informative) Examples of allocation of group numbers and classification for an electric supply system for safety services of medical locations .....</b>	<b>505</b>
<b>Annex B.710 (informative) Guidance concerning electromagnetic interferences (EMI)</b>	<b>506</b>
<b>CHAPTER 711 EXHIBITIONS, SHOWS AND STANDS .....</b>	<b>507</b>
<b>711:11 Scope.....</b>	<b>507</b>
<b>711:31 Purposes, supplies and structure.....</b>	<b>507</b>
<b>711:31-3 Supplies.....</b>	<b>507</b>
<b>711:32 Classification of external influences.....</b>	<b>507</b>
<b>711:4 Protection for safety .....</b>	<b>507</b>
<b>711:41 Protection against electric shock.....</b>	<b>507</b>
<b>711:41-1 Protective measure: automatic disconnection of supply .....</b>	<b>507</b>

711:41-5 Additional protection .....	508
711:42 Protection against thermal effects .....	508
711:42-2 Precautions where particular risks of fire exist .....	508
711:5 Selection and erection of electrical equipment .....	508
711:51 Common rules .....	508
711:51-1 Compliance with standards .....	508
711:52 Wiring systems .....	508
711:52-1 Types of wiring systems .....	508
711:52-6 Electrical connections .....	509
711:53 Isolation, switching and control .....	509
711:53-5 Co-ordination of various protective devices .....	509
711:53-6 Isolation and switching .....	509
711:55 Other equipment .....	509
711:55-9 Luminaires and lighting installations .....	509
711:6 Verification .....	510
<b>CHAPTER 712 SOLAR PHOTOVOLTAIC (PV) POWER SUPPLY SYSTEMS</b>	<b>511</b>
712:11 Scope .....	511
712:3 Assessment of general characteristics .....	511
712:31 Purpose, supplies and structure .....	511
712:4 Protection for safety .....	513
712:41 Protection against electric shock .....	513
712:41-0 Introduction .....	513
712:41-2 Protective measure: double or reinforced insulation .....	513
712:41-4 Protective measure: extra-low-voltage provided by SELV and PELV .....	513
712:42 Protection against thermal effects .....	514
712:42-1 Protection against fire caused by electrical equipment .....	514
712:43 Protection against overcurrent .....	514
712:43-2 Nature of protective devices .....	515
712:43-3 Protection against overload current .....	515
712:43-4 Protection against short-circuit currents .....	517
712:44 Protection against voltage disturbances and electromagnetic disturbances	517
712:44-3 Protection against transient overvoltages of atmospheric origin or due to switching .....	517
712:44-3.4 Overvoltage control .....	517
712:44-4 Measures against electromagnetic influences .....	518
712:5 Selection and erection of electrical equipment .....	518
712:51 Common rules .....	518
712:51-1 Compliance with standards .....	518
712:51-2 Operational conditions and external influences .....	519
712:51-3 Accessibility .....	519
712:51-4 Identification .....	519

712:51-5 Prevention of mutual detrimental influence.....	520
712:52 Wiring systems .....	521
712:52-1 Types of wiring systems .....	521
712:52-3 Current-carrying capacities.....	522
712:52-4 Cross-sectional areas of conductors .....	522
712:52-5 Voltage drop in consumers installations .....	523
712:52-6 Electrical connections .....	523
712:52-7 Selection and erection of wiring systems to minimize spread of fire	524
712:52-8 Proximity of wiring systems to other services .....	524
712:52-9 Selection and erection of wiring systems in relation to maintainability, .....	524
712:53 Isolation, switching and control .....	524
712:53-1 Devices for protection against indirect contact (fault protection) by automatic disconnection of supply .....	524
712:53-2 Devices for protection against thermal effects .....	526
712:53-3 Devices for protection against overcurrent .....	526
712:53-4 Devices for protection against transient overvoltages .....	527
712:53-6 Isolation and switching .....	528
712:54-1 Earthing arrangements and protective conductors .....	529
712:54-2 Earthing arrangements .....	529
712:55 Other equipment .....	529
712:6 Inspection and testing .....	529
Annex A.712 (informative) PV installation information .....	544
Annex B.712 (normative) Calculation of UOC MAX and ISC MAX .....	546
Annex C.712 (informative) Examples of signs .....	548
Annex D.712 (informative) Blocking diode.....	549
Annex E.712 (informative) Arc fault detection and interruption in PV arrays ..	553
<b>CHAPTER 713 FURNITURE .....</b>	<b>554</b>
713:11 Scope.....	554
713:41 Protection for safety – Protection against electric shock .....	554
713:41-5 Additional protection .....	554
713:52 Wiring systems .....	554
713:52-2 Selection and erection of wiring systems in relation to external influences .....	554
713:55 Selection and erection of electrical equipment – Other equipment ...	555
713:55-6 Socket outlets.....	555
<b>CHAPTER 714 EXTERNAL LIGHTING INSTALLATIONS.....</b>	<b>556</b>
714:11 Scope.....	556
714:4 Protection for safety .....	556
714:41 Protection against electric shock .....	556
714:41-1 Protective measure: automatic disconnection of supply .....	556

714:A.41 Provisions for basic protection .....	556
714:5 Selection and erection of electrical equipment .....	557
714:51 Common rules .....	557
714:51-2 Operational conditions and external influences .....	557
714:53 Isolation, switching and control .....	557
714:53-6 Isolation and switching .....	557
<b>CHAPTER 715 EXTRA-LOW-VOLTAGE LIGHTING INSTALLATIONS .....</b>	<b>558</b>
715.11 Scope .....	558
715:4 Protection for safety .....	558
715:41 Protection against electric shock .....	558
715:41-4 Protective measure: extra-low-voltage provided by SELV and PELV .....	558
715:42 Protection against thermal effects .....	558
715:43 Protection against overcurrent .....	559
715:5 Selection and erection of electrical equipment .....	559
715:52 Wiring systems .....	559
715:52-1 Types of wiring system .....	559
715:52-4 Cross-sectional areas of conductors .....	560
715:52-5 Voltage drop in consumers' installations .....	560
715:53 Isolation, switching and control .....	560
715:53-6 Isolation and switching .....	560
<b>CHAPTER 716 ELV DC power distribution over information and communications technology (ICT) cable infrastructure .....</b>	<b>561</b>
716:11 Scope .....	561
716:4 Protection for safety .....	561
716:41 Protection against electric shock .....	561
716:43 Protection against overcurrent .....	562
716:43-3 Protection against overload current .....	562
716.52 Selection and erection of electrical equipment – Wiring systems .....	562
716:52-1 Types of wiring system .....	562
716:52-3 Current-carrying capacities .....	562
716:52-6 Electrical connections .....	562
<b>CHAPTER 717 MOBILE OR TRANSPORTABLE UNITS .....</b>	<b>563</b>
717:11 Scope .....	563
717:3 Assessment of general characteristics .....	563
717:31 Purposes, supplies and structure .....	563
717:31-2 Conductor arrangement and system earthing .....	563
717:31-3 Supplies .....	563
717:4 Protection for safety .....	564
717:41 Protection against electric shock .....	564
717:41-1 Protective measure: automatic disconnection of supply .....	564

717:41-3 Protective measure: electrical separation .....	565
717:41-5 Additional protection .....	565
717:43 Protection against overcurrent.....	565
717:43-1 Requirements according to the nature of the circuits.....	565
717:5 Selection and erection of electrical equipment .....	565
717:51 Common rules .....	565
717:51-4 Identification .....	565
717:52 Wiring systems .....	566
717:55 Other equipment.....	566
717:55-1 Low-voltage generating sets.....	566
717:55-6 Socket-Outlets .....	566
717:61-5.2 Frequency of periodic verification.....	567
<b>CHAPTER 718 COMMUNAL FACILITIES AND WORKPLACES .....</b>	<b>575</b>
718:11 Scope.....	575
718:4 Protection for safety .....	575
718:42 Protection against thermal effects .....	575
718:42-1 Protection against fire caused by electrical equipment .....	575
718:42-2 Precautions where particular risks of fire exist .....	575
718:5 Selection and erection of electrical equipment .....	575
718:53 Isolation, switching and control .....	575
718:53-6 Isolation and switching .....	575
718:55 Other equipment .....	576
718:55-9 Luminaires and lighting installations.....	576
718:83 Fire detection and alarm systems .....	576
<b>CHAPTER 720 HAZARDOUS LOCATIONS – GENERAL REQUIREMENTS</b>	<b>578</b>
720:11 Scope.....	578
720:3 Assessments of general characteristics .....	578
720:3-101 Classification of zones .....	578
720:41 Protection against electric shock.....	579
720:5 Selection and erection of equipment .....	580
720:51 Common rules .....	580
720:52 Wiring systems .....	581
720:55 Other equipment .....	582
720:55-3 Assurance of conformity of equipment.....	582
720:6 Verification .....	583
720:61 Initial and periodic verification .....	583
720:61-1 Initial verification .....	583
<b>CHAPTER 721 ELECTRICAL INSTALLATIONS IN CARAVANS AND MOTOR CARAVANS .....</b>	<b>584</b>
721:11 Scope.....	584
721:3 Purposes, supplies and structure.....	584

721:31-3 Supplies.....	584
721:4 Protection for safety .....	584
721:41 Protection against electric shock .....	584
721:41-3 Protective measure: electrical separation .....	584
721:41-4 Protective measure: extra-low voltage provided by SELV and PELV .....	584
721:41-5 Additional protection .....	585
721:41-5.101 Additional protection: residual current protective devices (RCDs) .....	585
721:43 Protection against overcurrent.....	585
721:43-1 Requirements according to the nature of the circuits .....	585
721:5 Selection and erection of equipment .....	585
721:51 Common rules .....	585
721:51-0 Introduction.....	585
721:51-2 Operational conditions and external influences.....	585
721:51-4 Identification .....	585
721:52 Wiring systems .....	585
721:52-1 Types of wiring systems .....	585
721:52-2 Selection and erection of wiring systems in relation to external influences .....	586
721:52-4 Cross-sectional areas of conductors .....	586
721:52-6 Electrical connections .....	586
721:53 Isolation, switching and control .....	586
721:53-6 Isolation and switching .....	586
721:54-3 Protective conductors.....	587
721:55 Other equipment.....	587
Annex A.721 (normative) Instructions for electricity supply .....	589
A.721:1 Connection.....	589
A.721:2 Disconnection.....	589
A.721:3 Periodic inspection .....	589
Annex B.721 (informative) Extra low-voltage dc installations .....	590
B.721:31-3 Supplies .....	590
B.721:51 Common rules.....	590
B.721:51-4 Identification.....	590
B.721:51-5 Prevention of mutual detrimental influence .....	590
B.721:52-1 Types of wiring systems.....	590
B.721:52-3 Current-carrying capacities .....	590
B.721:52-5 Voltage drop in consumers' installations.....	591
B.721:52-8 Proximity of wiring systems to other services .....	591
B.721:53 Isolation, switching and control.....	591
B.721:53-3 Devices for protection against overcurrent .....	591
B.721:55 Other equipment .....	592

<b>B.721:55-2</b>	<b>General requirements</b>	592
a)	a plug complying with ISO 1724 and ISO 3732 or ISO 11446 (all parts), and	592
b)	a flexible cord or cable with the number of cores with the minimum cross-sectional area and the allocation according to Table B.721-1 and a length not exceeding 5 m, and	592
c)	a connector complying with ISO 1724 and ISO 3732 or ISO 11446 (all parts).	592
<b>Annex C.721 (informative)</b>	<b>Current-carrying capacities</b>	596
<b>C.721:1</b>		596
<b>C.721:1-1</b>	<b>Graphs for obtaining minimum cross-sectional areas</b>	596
<b>C.721:1-2</b>	<b>Calculation of the minimum cross-sectional areas</b>	596
<b>C.721:2</b>		596
<b>C.721:3</b>		596
<b>CHAPTER 722</b>	<b>CHARGERS FOR ELECTRIC VEHICLES</b>	599
<b>722:1</b>	<b>Scope</b>	599
<b>722:2</b>	<b>General requirements</b>	599
<b>722:2-1</b>	<b>Electric vehicle charging system components</b>	599
<b>722:2-2</b>	<b>Cases for EV charging cable connection</b>	601
<b>722:2-3</b>	<b>Charging times and charging modes</b>	602
<b>722:3</b>	<b>Purposes, supplies and structure</b>	603
<b>722:31-1</b>	<b>Maximum demand and diversity factor</b>	603
<b>722:31-2</b>	<b>Conductors arrangement and systems earthing</b>	603
<b>722:31-4</b>	<b>Division of circuit installations</b>	603
<b>722:4</b>	<b>Protection for safety</b>	603
<b>722:41</b>	<b>Protection against electric shock</b>	603
<b>722:44-3.4</b>	<b>Overvoltage control</b>	604
<b>722:44-4</b>	<b>Appropriate Measures Against Electromagnetic Influences</b>	604
<b>722:5</b>	<b>Selection and erection of electrical equipment</b>	604
<b>722:51</b>	<b>Common rules</b>	604
<b>722:51-1</b>	<b>Compliance with standards</b>	604
<b>722:51-2</b>	<b>Operational conditions and external influences</b>	604
<b>722:53</b>	<b>Selection and erection of electrical equipment – Isolation, switching and control</b>	605
<b>722:53-0</b>	<b>Introduction</b>	605
<b>722:53-0.2</b>	<b>General and common requirements</b>	605
<b>722:53-1</b>	<b>Devices for protection against indirect contact by automatic disconnection of supply</b>	605
<b>722:53-5</b>	<b>Co-ordination of various protective devices</b>	606
<b>722:54</b>	<b>Earthing arrangements and protective conductors</b>	606
<b>722:54-3</b>	<b>Protective conductors</b>	606
<b>722:55</b>	<b>Other equipment</b>	606

722:55-101 Socket-outlets and vehicle connectors .....	606
722:55-102 EV charging stations .....	606
722:6 Verification .....	607
722:61 Initial verification.....	607
722:61 Periodic verification .....	607
<b>Appendix A.722 Electric Vehicle Charging Systems .....</b>	<b>610</b>
<b>A.722-1 Equipment installations .....</b>	<b>610</b>
<b>A.722-1.1 Electric vehicle coupler .....</b>	<b>610</b>
<b>A.722-2 Rated power .....</b>	<b>610</b>
<b>A.722-3 Discerning marks .....</b>	<b>610</b>
<b>A.722-4 Connectors and cables .....</b>	<b>610</b>
<b>A.722-5 Locking equipment.....</b>	<b>610</b>
<b>A.722-6 User protection system.....</b>	<b>611</b>
<b>CHAPTER 729 OPERATING OR MAINTENANCE GANGWAYS .....</b>	<b>612</b>
729:11 Scope.....	612
729:3 Assessment of general characteristics .....	612
729:51-3 Accessibility .....	612
<b>Annex A.729 (normative) Additional requirements for closed restricted access areas</b>	<b>618</b>
<b>A.729-1 Evacuation.....</b>	<b>618</b>
<b>Annex B.729 (informative) Additional information for closed restricted access areas</b>	<b>621</b>
<b>B.729-1 Ventilation and conditioning .....</b>	<b>621</b>
<b>B.729-2 Construction and lighting .....</b>	<b>621</b>
<b>CHAPTER 730 ELECTRIC SIGNS AND OUTLINE LIGHTING .....</b>	<b>622</b>
730:11 Scope.....	622
730:31 Purposes, supplies and structure.....	622
730:31-3 Supplies.....	622
730:41 Protection against electric shock.....	622
730:41-2 Protective measure: double or reinforced insulation .....	622
730:B.41-3 Placing out of reach .....	623
730:5 Selection and erection of electrical equipment .....	623
730:51 Common rules .....	623
730:51-4 Identification .....	623
730:51-5 Prevention of mutual detrimental influence.....	623
730:52 Wiring systems .....	623
730:52-2 Selection and erection of wiring system in relation to external influences .....	623
730:53 Isolation, switching and control .....	623
730:53-1 Devices for protection against indirect contact by automatic disconnection of supply .....	623

730:54 Earthing arrangements, protective conductors and protective bonding conductors .....	624
730:54-3 The protective conductors.....	624
730:54-4 Protective bonding conductors .....	624
730:55 Other equipment.....	625
730:55-2 Transformers.....	625
730:55-3 Inverters and converters .....	625
730:61 Verification .....	625
730:61-4 Initial verification.....	625
730:61-4.1.....	625
730:61-4.2 Inspection .....	625
<b>CHAPTER 740 TEMPORARY ELECTRICAL INSTALLATIONS FOR STRUCTURES, AMUSEMENT DEVICES AND BOOTHS AT FAIRGROUNDS, AMUSEMENT PARKS AND CIRCUSES .....</b>	<b>626</b>
740:11 Scope.....	626
740:3 Assessment of general characteristics .....	626
740:31 Purposes, supplies and structure.....	626
740:31-3 Supplies.....	626
740:4 Protection for safety .....	626
740:41 Protection against electric shock.....	626
740:41-1 Protective measure: automatic disconnection of supply .....	627
740:42 Protection against thermal effects .....	627
740:42-1 Protection against fire caused by electrical equipment .....	627
740:5 Selection and erection of electrical equipment .....	627
740:51 Common rules .....	627
740:52 Wiring systems .....	627
740:52-1 Types of wiring systems .....	627
740:52-6 Electrical connections .....	628
740:53 Isolation, switching and control .....	628
740:53-6 Isolation and switching .....	628
740:55 Other equipment.....	628
740:55-1 Low-voltage generating sets.....	628
740:55-6 Socket-outlets .....	628
740:55-9 Luminaires and Lighting installation .....	629
740:6 Verification .....	630
<b>CHAPTER 750 LIFTS AND ESCALATORS .....</b>	<b>631</b>
750:11 Scope.....	631
750:31 Purposes, supplies and structure.....	631
750:31-3 Supplies.....	631
750:41 Protection against electric shock.....	631
750:41-1 Protective measure: automatic disconnection of supply .....	631
750:A.41 Provision for basic protection.....	632

750:A.41-1 Basic Insulation of live parts.....	632
750:B.41 Obstacles and placing out of reach .....	632
750:B.41-2 Obstacles .....	632
750:B.41-3 Placing out of reach .....	632
750:C.41-1 Protection by non-conducting locations.....	632
750:C.41-2 Protection by earth free local equipotential bonding .....	632
750:42 Protection against thermal effects .....	632
750:44 Protection against voltage disturbances and electromagnetic disturbances	632
750:44-3 Protection against overvoltages of atmospheric origin or due to switching .....	632
750:5 Selection and erection of electrical equipment .....	632
750:51 Common rules .....	632
750:51-2 Operational conditions and external influences .....	632
750:51-3 Accessibility .....	632
750:51-4 Identification .....	633
750:52 Wiring systems .....	633
750:52-1 Types of wiring systems .....	633
750:52-2 Selection and erection of wiring systems in relation to external influences .....	634
750:52-6 Electrical connections .....	634
750:53 Isolation, switching and control .....	634
750:53-3 Devices for protection against overcurrent .....	634
750:55 Other equipment.....	635
750:55-6 Socket-outlets .....	635
750:55-9 Luminaires and lighting installations .....	635
750:56 Safety services .....	635
750:56-1 .....	635
750:56-2 .....	635
750:56-3 .....	635
750:56-4 .....	636
750:6 Verification .....	636
750:61-4 Initial verification.....	636
750:61-4.1 Examinations and tests.....	636
750:61-4.2 .....	636
<b>CHAPTER 753 HEATING CABLES AND EMBEDDED HEATING SYSTEMS</b>	<b>638</b>
753:11 Scope.....	638
753:4 Protection for safety .....	638
753:41 Protection against electric shock.....	638
753:B.41 Obstacles and placing out of reach.....	638
753:41-1 Protective measure: automatic disconnection of supply .....	638
753:41-3 Protective measure: electrical separation .....	638
753:42 Protection against thermal effects .....	638

753:42-3 Protection against burns .....	638
753:42-4 Protection against overheating .....	638
753:5 Selection and erection of electrical equipment .....	639
753:51 Common rules .....	639
753:51-1 Compliance with standards.....	639
753:51-4 Identification .....	639
753:51-5 Prevention of mutual detrimental influences .....	639
753:52 Wiring systems .....	639
753:52-2 Selection and erection of wiring systems in relation to external influences .....	639
Annex A.753 (normative) Information for the user of the installation.....	641
<b>PART EIGHT SPECIAL SYSTEMS .....</b>	<b>642</b>
<b>CHAPTER 81 POWER FACTOR CORRECTION .....</b>	<b>643</b>
81-1 Scope .....	643
81-2 Basic concepts of power factor .....	643
81-3 Advantages of power factor correction.....	643
81-4 Selection and erection of power factor correction equipment .....	643
81-4.1 Rated voltage .....	643
81-4.2 Operating temperature .....	644
81-4.3 Selection.....	644
81-4.4 Erection of equipment.....	645
81-5 Effects of harmonics .....	648
81-5.1 Resonance .....	648
81-5.2 Selection of capacitor specification.....	648
81-6 Verification .....	649
81-6.1 Verification of installation .....	649
81-6.2 Verification of capacitors.....	649
General rule valid for any size of transformer(s).....	653
Annex A.81 (informative) .....	655
A.81-1 Examples .....	655
A.81-1.1 Example on assessment of kVAR rating of the capacitors .....	655
A.81-1.2 Examples on methods of Power Factor Correction .....	655
A.81-1.3 Examples on harmonic – suppression .....	657
<b>CHAPTER 82 PROTECTION AGAINST LIGHTNING .....</b>	<b>659</b>
82-1 Scope .....	659
82-2 Lightning current parameters.....	659
82-3 Damage due to lightning.....	659
82-3.1 Damage to a structure .....	659
82-3.2 Types of loss .....	661
82-4 Need and economic justification for lightning protection .....	661
82-4.1 Need for lightning protection.....	661

82-4.2 Economic justification of lightning protection .....	661
82-5 Protection measures.....	662
82-5.1 General .....	662
82-5.2 Protection measures to reduce injury of living beings by electric shock .....	662
82-5.3 Protection measures to reduce physical damage .....	662
82-5.4 Protection measures to reduce failure of electrical and electronic systems .....	662
82-5.5 Protection measures selection .....	662
82-6 Basic criteria for protection of structures .....	663
82-6.1 General .....	663
82-6.2 Lightning protection levels (LPL) .....	663
82-6.3 Lightning protection zones (LPZ).....	664
82-6.4 Protection of structures.....	664
<b>CHAPTER 83 FIRE DETECTION AND PROTECTION SYSTEMS – ELECTRICAL INSTALLATION REQUIREMENTS .....</b>	<b>672</b>
83-1 Scope .....	672
83-2 General requirements .....	672
83-3 Electric power supply .....	672
83-4 Wiring .....	672
83-5 Testing and maintenance .....	672
<b>CHAPTER 84 ENERGY EFFICIENCY .....</b>	<b>673</b>
84-1 Scope .....	673
84-2 General.....	673
84-3 Energy efficiency assessment for electrical installations .....	674
84-4 Sectors of activities .....	674
84-5 Design requirements and recommendations .....	674
84-6 Losses in the wiring .....	676
84-7 Determination of the zones, usages and meshes .....	676
84-8 Energy efficiency and load management system .....	679
84-9 Maintenance and enhancement of the performance of the installation .	684
84-10 Parameters for implementation of efficiency measures .....	686
<b>Annex A.84 (informative) Determination of transformer and switchboard location using the barycentre method.....</b>	<b>697</b>
<b>REFERENCED STANDARDS .....</b>	<b>728</b>
